RE: Lagoon Cleanup, Oakland County 245

Dear Mr. Beard:

To confirm our conversation of October 28, 1983, you have contracted with General Oil Company for removal of all liquid, sludge and a one (1) foot layer of clay from the waste lagoon located on your property. As you are responsible for assuring the proper disposal of these wastes, Mike Dawkins, at your request, has assured me that the waste materials will be properly disposed of in accordance with State and Federal regulations. Mike Dawkins has stated the sludge and soil will be taken to City Disposal and the liquid will be treated at their own facility. You have also stated that part of your agreement included cleanup to the satisfaction of our office.

Please notify me when the cleanup will be started. Mike Dawkins has stated it will be within two weeks. We would like to inspect the site after the sludge and clay layer have been removed. After which, you have stated, the lagoon will be filled in with a clean fill material.

If you have any questions, please feel free to contact me.

Sincerely,
GROUNDWATER QUALITY DIVISION

Lynne King
